Hire a tutor

🎓 **Experienced Tutor | Massachusetts Institute of Technology | MSc in Computer Science**

With 16 years of teaching experience and degrees from MIT (MSc Computer Science) and Stanford (BSc Software Engineering), I specialise in A-Level Computer Science, IB Computer Science, and AP Programming, helping students excel globally in programming and theory.

Teaches: A-Level Computer Science | IB Computer Science

Curriculum: A-Level | IB

Qualifications

Massachusetts Institute of Technology: MSc in Computer Science (2004-2006)

Stanford University: BSc in Software Engineering (2000-2004)

Vetted Tutor

Personally Interviewed

Our tutors go through a rigorous selection process, having been interviewed to assess their teaching skills and subject knowledge. **They have extensive tutoring experience with a track record of success**, helping students achieve their academic goals.

Tutoring Experience

My tutoring journey began over 16 years ago, helping high school students master complex algorithms and computational thinking. Since then, I've worked with learners across A-Level, IB, and AP curricula, focusing on core areas like data structures, operating systems, and Python programming. Many of my students have gone on to pursue tech degrees at prestigious universities.

I have extensive experience working with diverse learners, including students with autism and ADHD. My lessons are tailored to develop not just academic understanding but also practical problem-solving skills. From building efficient code to analysing algorithms, I ensure students are fully prepared for exams and beyond.

In addition to academic tutoring, I guide students in applying programming to real-world scenarios, such as web development and machine learning. By integrating theoretical knowledge with practical application, I aim to inspire a deeper understanding and appreciation of computer science.
